SUMMARY

AI Consultant at Convergent Business Technologies since 2024, building automation and AI systems that remove manual work from finance, compliance and recruiting workflows using Python, SQL, n8n and LLMs. Shipped a production recruitment portal on Next.js and Supabase, and an end to end AI assisted retail reporting pipeline (UAE and KSA) that cut the full monthly refresh from 7 days to about 2 hours.

SKILLS

Programming: Python, SQL, FastAPI, TypeScript, Next.js

AI and Automation: LLM workflow automation, generative AI and LLMs, n8n, AI agents, RAG and prompt pipelines, API integration, ZATCA e invoicing integration

Data and BI: ETL data pipelines, relational SQL database design, Tableau, Power BI, Microsoft Excel

Tools: Docker, Git, Supabase, Vercel, Notion, Gemini, Odoo, Microsoft Dynamics 365, Zoho, QuickBooks

EXPERIENCE

Convergent Business Technologies, Pakistan

2024 to present

AI Consultant

- Implemented AI assisted workflow automation using LLMs and n8n
- Automated manual workflows, reducing processing time by 60 to 75 percent
- Developed automated ETL pipelines using Python, SQL and Excel
- Designed centralized SQL databases to remove version conflicts
- Built dashboards and reports using Tableau and Power BI
- Collaborated with business, audit and IT teams to ensure system traceability

PROJECTS

PepsiCo Retail Analytics, UAE and KSA

2024

Stack: Python, Tableau, Gemini, Docker, Excel

- Built an end to end monthly reporting pipeline for UAE and KSA retail data, harmonizing SKU level sales, quantity, volume, manufacturer and competitor detail across 13 retailers into one role based platform
- Automated SKU matching using Python and AI assisted logic as one step in the pipeline, reducing matching time from 80 minutes to 40 seconds per 100 SKUs, accuracy up from 70 to 95 percent
- Automated the full monthly refresh, database push, Tableau dashboard rebuild, and Excel report generation, with all numbers validated automatically before delivery to decision makers
- Cut the full monthly reporting cycle from 7 days to about 2 hours, and data validation turnaround from 3 days to 1
- Containerized workflows with Docker for smoother onboarding of analysts

ZTBL Credit Risk Model Automation

2025

Stack: Python, SQL, Docker, Excel

- Automated 20+ Excel based PD, LGD, EAD and ECL models using Python and SQL, reducing manual effort by about 75 percent
- Designed and deployed a relational SQL database to centralize inputs, eliminating version conflicts

ZATCA Phase 2 E Invoicing Integration, Banking and Compliance

2026

Stack: Python, SQL, ZATCA API, Odoo, Microsoft Dynamics 365, Zoho, QuickBooks

- Integrated a core banking system with ZATCA Phase 2 e invoicing for automated, regulation compliant invoice clearance with the tax authority
- Built ZATCA compliant e invoicing for Odoo and Microsoft Dynamics 365
- Automated invoice generation, validation and submission end to end, removing manual compliance overhead

CBT Recruitment Workflow Automation

2024

Stack: Python, Notion, n8n, LLMs

- Consolidated multiple recruitment workflows into a single Notion based platform
- Automated candidate assessment steps using workflow automation and LLMs, reducing coordination time by 60 percent
- Piloted AI agents for repetitive tasks, reducing average response time by 2 days
- Built a recruiter training module that improved shortlisting consistency by 35 percent

Independent AI Consultant

2026

Stack: Next.js, Supabase, Vercel, Python, Node.js

- Built and runs a live AI assistant with an admin pipeline at anas-qureshi-ai-consultant.vercel.app

- Built an end to end lead generation and cold outreach engine: public page scraping in Python, email extraction and validation with bounce handling, LLM personalization and automated sequencing

CBT Recruitment Portal, Full Stack Development

2025

Stack: Next.js, TypeScript, Tailwind CSS, Supabase, Vercel

- Built a production recruitment web application with a role based admin portal, dashboards, candidate tracking and assessment slot scheduling
- Implemented role based access control, authentication and resume file uploads
- Deployed on Vercel as a production system managing applications, assessments and admin workflows

EDUCATION

Iqra University, Islamabad. Bachelor of Science, Computer Science, 2019 to 2023.
