

Muhammad Anas

Data & Analytics Engineer | Python, SQL, Tableau, Power BI, ETL

muhammadanasq@gmail.com | +92 302 9222402 | linkedin.com/in/anasqureshiai | anas-qureshi-ai-consultant.vercel.app

SUMMARY

AI Consultant at Convergent Business Technologies since 2024, building ETL pipelines, centralized SQL databases and Tableau and Power BI dashboards for finance, compliance and recruiting teams using Python, SQL and Excel. Automated 20+ Excel based credit risk models, cut data validation turnaround from 3 days to 1 day, and cut SKU mapping time from 80 minutes to 40 seconds per 100 SKUs with Python and LLM assisted logic. Automated workflows have reduced processing time by 60 to 75 percent.

SKILLS

Data and BI: ETL data pipelines, relational SQL database design, Tableau, Power BI, Microsoft Excel

Programming: Python, SQL, FastAPI, TypeScript, Next.js

AI and Automation: LLM workflow automation, generative AI and LLMs, n8n, AI agents, API integration, ZATCA e invoicing integration

Tools: Docker, Notion, Gemini, Supabase, Vercel, Antigravity, Odoo, Microsoft Dynamics 365, Zoho, QuickBooks

Practices: Requirement gathering, process optimization, problem solving, coordination with business, audit and IT teams

EXPERIENCE

Convergent Business Technologies, Pakistan

2024 to present

AI Consultant

- Developed automated ETL pipelines using Python, SQL and Excel
- Built dashboards and reports using Tableau and Power BI
- Designed centralized SQL databases to remove version conflicts
- Automated manual workflows, reducing processing time by 60 to 75 percent
- Implemented AI assisted workflow automation using LLMs and n8n
- Collaborated with business, audit and IT teams to ensure system traceability

PROJECTS

PepsiCo Retail Analytics

2024

Stack: Python, Tableau, Gemini, Docker, Excel

- Automated SKU mapping using Python and AI assisted logic, reducing mapping time from 80 minutes to 40 seconds per 100 SKUs
- Increased mapping accuracy from 70 percent to 95 percent using a combination of rules and LLM fine tuning
- Designed Tableau dashboards tracking sales, pricing and availability across 13 retailers
- Reduced data validation turnaround from 3 days to 1 day and reporting delays by 66 percent
- Containerized workflows with Docker for smoother onboarding of analysts

ZTBL Credit Risk Model Automation

2025

Stack: Python, SQL, Docker, Excel

- Automated 20+ Excel based PD, LGD, EAD and ECL models using Python and SQL, reducing manual effort by about 75 percent
- Designed and deployed a relational SQL database to centralize inputs, eliminating version conflicts

ZATCA Phase 2 E Invoicing Integration, Banking and Compliance

2026

Stack: Python, SQL, ZATCA API, Odoo, Microsoft Dynamics 365, Zoho, QuickBooks

- Integrated a core banking system with ZATCA Phase 2 e invoicing for automated, regulation compliant invoice clearance with the tax authority
- Built ZATCA compliant e invoicing for major accounting platforms including Odoo and Microsoft Dynamics 365
- Automated invoice generation, validation and submission end to end, removing manual compliance overhead

CBT Recruitment Workflow Automation

2024

Stack: Python, Notion, n8n, LLMs

- Consolidated multiple recruitment workflows into a single Notion based platform
- Automated candidate assessment steps using workflow automation and LLMs, reducing coordination time by 60 percent
- Piloted AI agents for repetitive tasks, reducing average response time by 2 days
- Built a recruiter training module that improved shortlisting consistency by 35 percent

CBT Recruitment Portal, Full Stack Development

2025

Stack: Next.js, TypeScript, Tailwind CSS, Supabase, Vercel, Antigravity

- Developed a recruitment web application for the Convergent Graduate Academy Program (CGAP) using Next.js and Supabase
- Built a role based admin portal with dashboards, candidate tracking and assessment slot scheduling
- Implemented role based access control, authentication and resume file uploads
- Used the Antigravity AI agent for real time debugging, adaptive coding and deployment automation
- Deployed on Vercel as a production system managing applications, assessments and admin workflows

Independent AI Consultant, live AI assistant and admin pipeline

2026

Stack: Next.js, Supabase, Vercel

- Built and run a live AI assistant demo with an admin pipeline at anas-qureshi-ai-consultant.vercel.app

Data Analytics Training, Hands On Projects

2024

Stack: Python, SQL, Tableau, Power BI, Excel

- Completed training in CS50, SQL, Agile, Cloud Foundations, Applied Statistics, Tableau and Power BI
- Built dashboards and applied statistical learning to real world dataset profiling and reporting, using the Adventure Works DB and IBM Red Book case studies

EDUCATION

Iqra University, Islamabad

2019 to 2023

Bachelor of Science, Computer Science
